

Homework 5 – 15 pts

Due: March 29 5 pm

THIS IS AN INDIVIDUAL ASSIGNMENT!

This assignment is to give you some practice creating screen records in COBOL. Download the LISTEMP.CBL, NEWEMP.IDX and NEWEMP.DAT files from this assignment.

You will modify the LISTEMP program to DISPLAY/ACCEPT screen records instead of the DISPLAY/ACCEPT statements that are in this program. Design is entirely up to you. But the program should function the same only that all DISPLAY and ACCEPT statements are accomplished with Screen Records.

The display should include a title line, date and should at a minimum clear the screen at the prompt to enter a new SS number. The Salary should have some edit code(s) to format the number.

The display can utilize all lines of the screen. It should not look exactly like the program display output that is there now.

Rubric is:

HW 05 Rubric   			
Criteria	Ratings		Pts
Use of Screen Records Screen records are displayed and accepted instead of individual fields	5 pts Full Marks	0 pts No Marks	5 pts
Screen Design is pleasing Screen colors are easy on the eyes, navigation is simple and understandable, layout makes it easy to read data. Messages are meaningful.	5 pts Full Marks	0 pts No Marks	5 pts
Documentation Program Banner follows guidelines. Every paragraph is documented	5 pts Full Marks	0 pts No Marks	5 pts
			Total Points: 15
